"INSURGENTS" IN THE SADDLE

Star Con. Management Passes Into New Hands.

WEEK'S ORE AND BULLION SET-TLEMENTS LARGE.

REPORTS SUBMITTED

It took from 2:30 till 5:30 yesterday afternoon to pull off the Star Consolidated annual meeting, but it was finally accomplished with the "insurgents' maming the new board of directors and officers by a plurality of approximately 21,500 votes. The real test of strength came with the naming of the permanent chairman of the meeting, H. E. Booth being nominated by the "insurgents" and H. T. Reynolds by the Packard contingent. The vote stood 243,750 against 207,889.

When it came to voting for officers and directors there were a few scatter-ing votes, but the head of the "insur-gent" ticket received 233,595, while Mr. Sent' ticket received 233,595, while Mr. Packard received 212,044. Those who will serve the company in an official capacity, therefore, during the next twelve months are as follows: H. G. McMillan, president; J. P. Turner, vice president; Frank D. Kimball, treasurer; A. C. Ellis and C. F. Packard, the latter having been selected at the caucus on Friday. In order that the Packard interests should have representation. Following the election of the board of directors and officers named, W. H. Farnsworth was elected as secretary of the company and the meeting adthe company and the meeting ad

whether the old officers of the company were prepared to submit reports to the meeting is not known, but when they were called upon to do so they flatly refused. President Milan Packard did state, however, that there was something like \$5,100 in the treasury. No information concerning the company's indebtedness or what the mine has produced during the years since last a statement was made could be seen last a statement was made could be se-

last a statement was made could be secured.

There was considerable talk at the beginning of the meeting that if the insurgent element was victorious the legality of the proceedings would be tested in court, Attorney J. H. Hurd was in attendance and he registered protests against the voting of a number of proxies. As the sum total of them would not have changed the result in any way, it is not believed that any fight will be made. In fact, Mr. Hurd stated after the meeting that he did not expect that Mr. Packard would take the matter into court.

As soon as the books of the company have been turned over to Secretary Farnsworth it is understood that they will be audited and a statement of the company's condition made to the stock-bolders, who have nationally waited for the week on the mining exchange. company's condition made to the stockholders who have patiently waited for three years to get it. What will be done at the mine cannot be outlined until after the new officers and directors have got together and looked into things, but it may be taken for granted that the Lander proposition to build a mill for half of the mine will not receive serious consideration at their hands.

Of a Siumpy Week.

The week on the mine gechange, which has witnessed a number of favorite stocks going-steadily down the line, and with others having a struggle to keep their heads above water, closes with signs of a reaction, suight though they may be. The chief disturbing elements in the market have been Consolidated Mercur, Lower Mammoth and Sacramento, but the dizzy tumble in them has not had the least effect on the higher priced stocks, so the results have not been so disastrous after all.

Record Indicates That Management Has Been Doing Well.

TO EXPERT GOLD MINES. Manager Crowther of Continental Co.

Off for Mexico. For the Jouble purpose of attending to some business that has been awaiting him for some time and to absorb some of the glorious sunshine that will lay in his path. Herry M. Crowther left for Mexico by way of California yesterday afternoon. Concerning the details of his mission into Mexico Mr. Crowther declined to have anything to say at this time further than that he was going to look into a couple of gold propositions, one in the interests of the Continental Mines & Smelter corporation, of which he is general manager, and the other for New York capitalists.

York capitalists.
The Continental company, which is the owner of the Continental-Alta properties

at Alta, is, it is understood, preparing to branch out during the coming season and before the year ends it is most probable that it will have acquired mines not only in Mexico, but in British Columbia, as well. At least it is known that Manager Crowther has been investigating in a general way, propositions in the north that will receive closer attention in the near future. The Continental corporation is heavily financed and the men behind it are in the business of building bonanzas out of likely propositions.

REPORT FROM COMSTOCK.

Water Being Easily Handled and Ore

Coming in on 450 Level. Manager Dusseldorf of the Comstock is a receipt of advices from the mine that cause him to feel very buoyant. Superfuendent Hickey reports that the big station pump on the 400-foot level went into commission on Tuesday and that every noment since it has been working fault-essly and handling the water without an affort. On the 250 level the surface water is being taken care of by the pump and while it is necessary to keep the pump in commission, the amount of water making is so small that the slowest movement of which the pump is capable does he work.

ig is so small that the slowest have ent of which the pump is capable does he work.

The drift which is being sent out along he hanging-wall side of the thirty-six oot vein, has been driven sixty feet, or ver half the distance to where the big hoot of ore, formerly opened above, hould be encountered. The face is in hanganese, tale and stringers of fine, hard carbonate ore now, and it will not be surprising. Mr. Hickey says, if a solid sody of ore is encountered at any moment, notwithstanding that measurements indicate that fifty feet, or more may yet have to be run.

It is a long hard struggle that the Comstock company has had to prove its mine and the task has been one that men with less nerve and tenacity of purpose than Manager Dusseldorf, would have abandoned long ago. For success to come to him now will be a source of gratification to all of his friends, besides, bringing prominently to the front the west end of the Park City mineral zone.

FINANCIAL AGENT NAMED.

Samuel Newhouse's Interests Here to

Be in Charge of Coloradoan. Be in Charge of Coloradoan.

The announcement was made yesterday that Lafayette Hanchet, president of the National Bank of Idaho Springs, had been named as financial agent of Samuel Newhouse, and that on July 1 he would remove to this city and assume his duties. The story from Denver to the effect that he was to be general manager of the Newhouse Mines & Smelter corporation was misleading. It was learned at the offices of the company yesterday that the active management of the properties would remain just as they are today, with A. F. Bettles at the head of the metallurgical and milling departments and M. M. Johnson in absolute connts and M. M. Johnson in absolute col

OZOKERITE IN A WELL

Valuable Discovery Made on a Farm at Colton.

at Colton.

The Price Advocate squeezes out a little space to make mention of what appears to be a most important discovery at Colton. The item reads as follows:

"While digging a well for water on the ranch of Mrs. E. J. Thomas at Colton a few days ago a streak of ozokerite three feet in thickness was encountered. It is a true fissure vein. It is more than likely that the ranch will hereafter be worked for its mineral value instead of being farmed. Tests show the stuff to be of first grade."

Bingham Mining Notes.

Manager Cairns of the Eric will send lown a fine lot of shipping grade as soon is the roads permit.

The 1,000 or more tons of second grade ore at the Butler-Liberal, which were to have been hauled to Dewey, are intelinitely hung up by the Markham washouts.

definitely hung up by the Markham washouts.

The United States tramway grade will soon be materially improved to reduce liability to runaway accidents. As it now is, constant vigilance is necessary to forestall their recurrence.

During the past ten days the incline and tunnels of the Shawmut mine have been undergoing a cleaning out preparatory to inspection by eastern officials of the company expected here in a few days. It is understood the Shawmut is likely to soon resume development operations.

The storm of Tuesday proved a serious setback for ore haulers who have Markham gulch orders. It will be a week of two before the Markham county road can be put in even passable condition. A pe

Who it Was.

(Harper's Weekly.)

A well known New York Clergyman was telling his Bible class the story of the prodigal con at a recent session, and wishing to emphasize the disagreeable attitude of the elder brother on that decaylon, he laid especial stress. able attitude of the elder brother on that occasion, he laid especial stress on this phase of the parable. After describing the joy of the household over the return of the wayward son, he spoke of one who, in the midst of the festivities, failed to share in the jubilant spirit of the occasion.

"Can anybody in the class," he asked,
"tell me who this was?"

A small boy, who had been listening
sympathetically to the story, put up his "I know," he said beamingly, "it was the fatted calf."

In Sandy Hook.

(Short Stories.)

Barney met a brother Celt on the street one morning last week, and with a feeling of great excitement, said:
"They do tell me, Pat, that a whale have got inside Sandy Hook."
"How is that?" asked the other, where the said of the said.

"I don't know, but he's there."
"Thin Sandy must have the divil of big stomach."
